

# HOPE FOR DEPRESSION RESEARCH FOUNDATION

The Mission of the Hope for Depression Research Foundation (HDRF) is to fund innovative, international research to find the origins, diagnosis, treatment and prevention of depression and its related mood and other emotional disorders—bipolar disorder, dysthymia, postpartum depression, post-traumatic stress syndrome, anxiety disorder and suicide—with the ultimate goal of finding a cure.

HDRF sets itself apart with this specialized focus: it is the prime significantly-funded research organization, public or private, that emphasizes an affective neuroscience approach to depression research—integrating the fields of neuroscience (the biology of the brain) and affective science (the psychology of mood and emotions). HDRF’s targeted focus and streamlined funding strategy is unique in allowing rapid support of emerging new ideas in depression research.

**Every dollar raised goes directly to research.**
